

Small Cell & Wireless Site Installation Products

Products for all your Small Cell & Wireless Site Installations

WOODEN POLE APPLICATIONS

MacLean Power Systems - Network Solutions (MPSNS) provides a comprehensive line of hardware for all Small Cell installations, including:

Pole Line Hardware

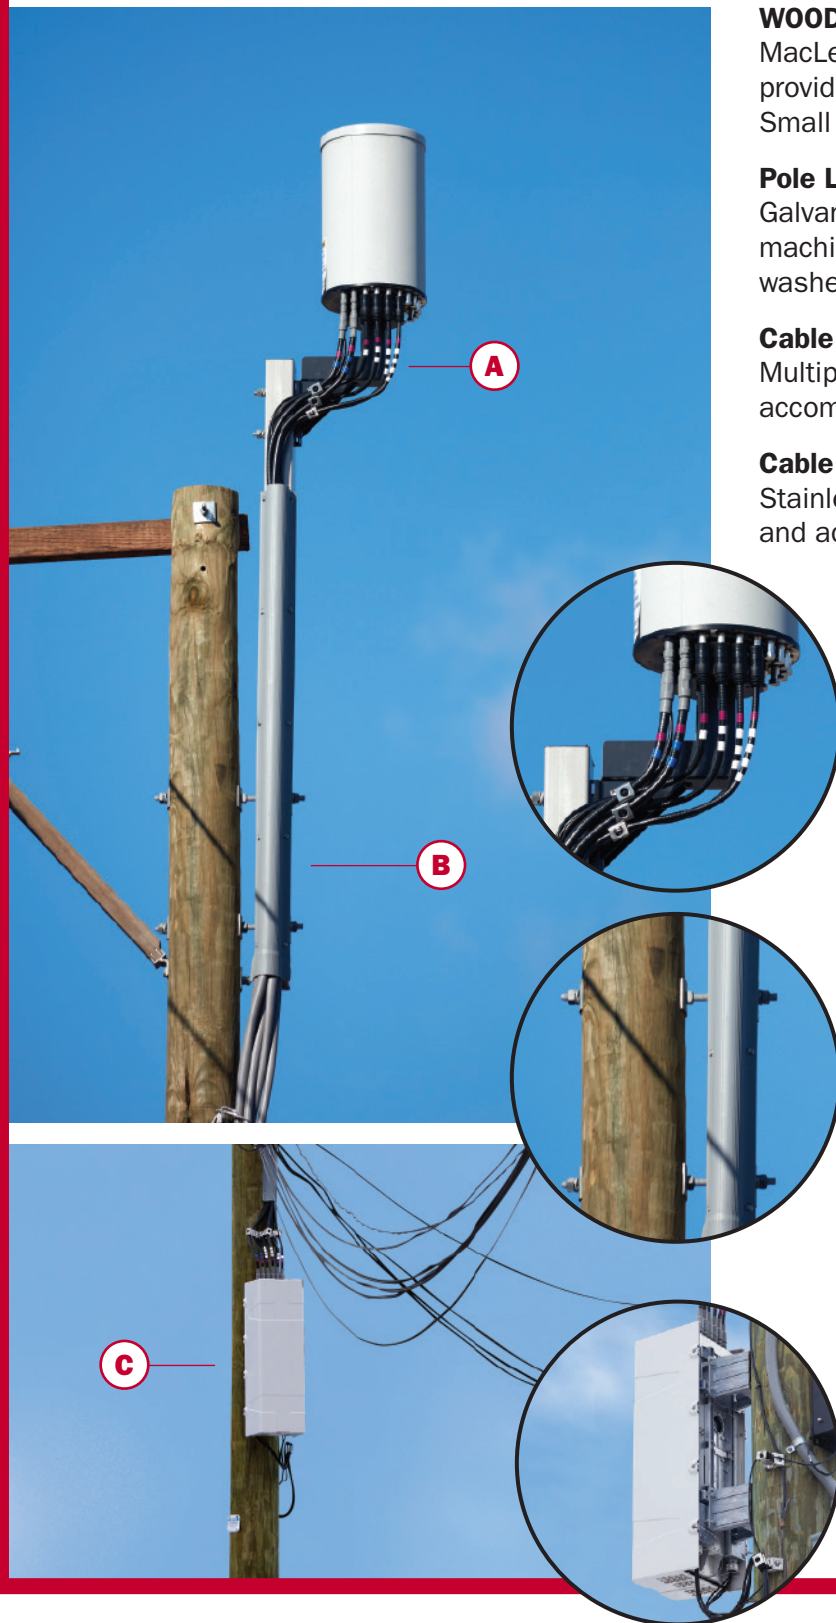

Galvanized steel products, including brackets, clamps, machine bolts, double arming bolts, carriage bolts, washers, nuts, anchors and automatic connectors.

Cable U-Guards

Multiple sizes and lengths, made of PVC or steel, with accompanying boots and attachment hardware.

Cable Management

Stainless steel interference protection snap-in clips and accessories.

A Customized Antenna Mounts

Offset or centerline rotating steel antenna mounts for pole top and/or pole top extension applications.

B Custom Fiberglass Cross Arm or Extension

Fiberglass timber with multiple applications, including a pole top extension for added height, or as a cross arm for offset antenna mounting.

C Universal Shroud Hardware

Numerous brackets, buckles and hardware supporting all shroud types and applications.

CUSTOM BUILDING MOUNTS & HARDWARE

A variety of mounting and hardware solutions to affix radios, antennas, NIDs and other essential network equipment to any pole, structure or building.

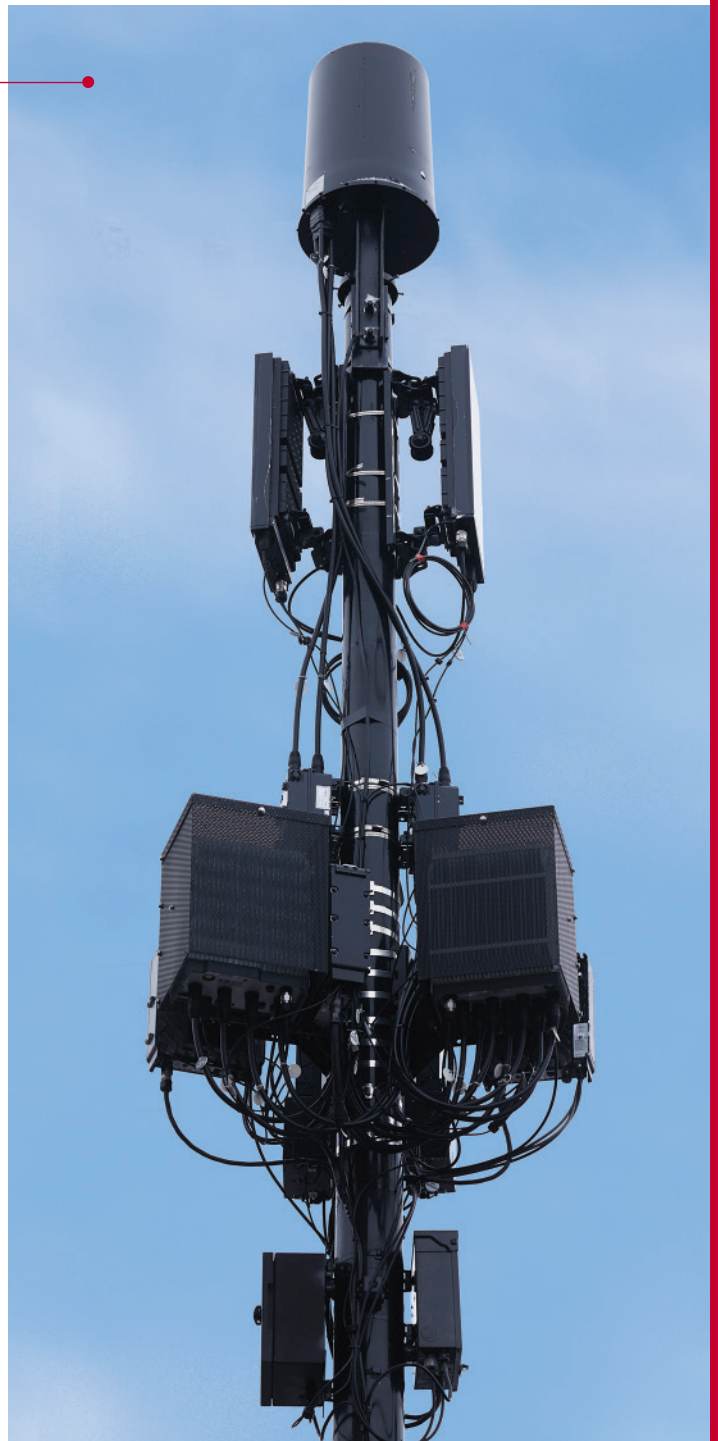

NON-WOOD POLE APPLICATIONS

A full line of stainless steel and aluminum banding products for metal, composite and concrete pole installations. Buckles, brackets and mounting hardware are also available.

FIBERGLASS POLE TOP EXTENSION - PTE

Multiple Pole Top Extension sizes and lengths. The PTE can support multiple solutions, for the installation of equipment above, inside or outside the PTE.

Products for all your Small Cell & Wireless Site Installations
